Landscape Structures Inc. Elevates the Play Experience with Volo™

New Smart Play® playstructure ignites imagination and adventure for all
Delano, Minn. (Feb. 8, 2024) — Landscape Structures Inc., a Delano, Minn.-based commercial playground equipment manufacturer, has introduced its latest product innovation, Volo™, a dynamic addition to the Smart Play® collection. Volo is not just a playground structure, it's designed to promote inclusive play, imaginative exploration and limitless adventure for children ages 5 to 12.

Landscape Structures has redefined the play experience with Volo. There's an option for integrated shade within the play-packed structure, which will welcome children of all abilities to discover and tailor their unique play styles. This new playstructure is engineered to provide both high-energy excitement and serene exploration making it the perfect addition to parks, schools and neighborhood playgrounds.

The heart of Volo beats with the introduction of the patent-pending LSI Flexx™. Landscape Structures' revolutionary steel-reinforced cable netting serves as a central hub within Volo, creating a new model for playground access and inclusion. This innovation connects the inner ring of the structure, offering children a spectrum of play sensations—from the tranquility of lounging to the exhilaration of bouncing and climbing. The design philosophy behind Volo emphasizes a seamless flow from one play activity to the next, ensuring a continuous loop of engagement and discovery.

Volo stands out with its preconfigured design featuring 20 interconnected activities that maximize play value without sacrificing space or creativity. Kids will find slack lines, bridges and hangout spots at all levels within the playstructure—activating spaces that are typically left empty. Landscape Structures

offers an array of carefully selected color palettes for Volo, allowing customers to complement their playground with the surrounding environment or choose colors that reflect their unique vision.

As part of the Smart Play line, Volo embodies Landscape Structures' commitment to supporting childhood development through play. From exploration to active climbing and social interaction, to the challenge of adventurous quests for older children, these playground designs cater to crucial developmental milestones.

Discover how Volo elevates the playground experience with imagination, inclusivity and adventure. Visit playsi.com/volo to learn more about this innovative playstructure and how it can transform your recreational space.

About Landscape Structures Inc.

Since 1971, Landscape Structures Inc. has been the leading manufacturer of commercial playground equipment in the world. Our employee-owned company designs community and school playgrounds that encourage kids of all ages and abilities to learn persistence, leadership, competition, bravery, support and empathy through play. We push the limits—of design, inclusion, play—to help kids realize there is no limit to what they can do today and in the future. For a better tomorrow, we play today.
